Final Year Cyber Security & Networks Student

Ambitious Cyber security and networks undergraduate at Glasgow Caledonian University (BSc Hons, expected 2026) with strong hands-on skills in penetration testing, Linux administration, and cloud security (AWS & Azure). Experienced in Python programming and security operations with practical knowledge of ethical hacking, Security Operations and Cisco Networking. Seeking full-time cyber security roles to apply technical expertise and contribute to securing critical systems.

Key Skills

- Penetration Testing: Conducted simulated attacks using Metasploit and Nmap during university labs to identify vulnerabilities.
 - Linux Administration: Managed Ubuntu servers and performed system hardening as part of academic projects.
 - Cloud Security (AWS & Azure): Deployed virtual networks and configured firewalls in AWS to monitor and control access.
 - Python Programming: Developed scripts automating network scanning and log analysis during academic projects.
 - Networking (Cisco tools, Routing & Switching): Configured Cisco routers and switches to design secure campus networks.
 - Security Operations: Configured Splunk SIEM to ingest and index log data, creating custom dashboards to monitor network activity and investigate security incidents
-

Education & Qualifications

Glasgow Caledonian University

BSc (Hons) Cyber Security and Networks (Expected 2026)

Relevant modules: Ethical Hacking, Applied Penetration Testing, Security Operations Analysis, Cloud Operations, Cyber Security, Networking, Web Application Development

Certifications:

- Certificate in Network Security (Cisco Networking Academy)
- National Progression Award in Cyber Security (SCQF Level 6)

Secondary Education:

Highers: Computing Science (A), Physics (B), English (B), Business (B), Modern Studies (B). **Nat 5:** Maths (A).

Work Experience

Micsoft (VFX Events) – IT Installation Technician, Glasgow (Jan 2025 – Present)

Installed and configured network-connected digital signage systems for both short-term hire and permanent commercial deployments.

- Set up and managed LAN/Wi-Fi connectivity for digital display screens, ensuring secure and stable network performance.
- Configured IP addressing, routers, switches, and remote access tools for screen content management systems (CMS).
- Implemented basic network security measures including password policies, and access controls to protect digital signage infrastructure.

Sainsbury's, Muirend – Food Assistant (Dec 2021 – Present).

- Delivered exceptional customer service, managing queries and helping shoppers efficiently.
- Supported daily operations with precise data handling and stock management using in-store systems.
- Trained to operate checkouts and supported onboarding of new staff.

J'adore Functions – Event Setup & Catering Assistant (July 2021- Aug 2021)

- Helped set up venues for weddings and events with decor and seating arrangements.
 - Served guests and ensured service ran smoothly under pressure.
 - Improved communication and time management in fast-paced settings
-

Charity & Volunteering

Fundraising Volunteer, Sarwar Foundation (2020 to 2025)

- Organised and supported multiple events, increasing fundraising targets by 15%.
- Collaborated effectively with a team to plan logistics and engage stakeholders
